Hi Praseedha,

Looks good!

Let me see it is acceptable for customer workflow.

Thanks Praseedha!

Kind Regards,
Kelinv

Hi Kelvin,

Please find the demo video for the prototype on multichannel image acquisition in ZEN Core at https://zeiss-my.sharepoint.com/:f:/p/praseedha_aniyath/EhhkpFYj6lFOuG5pM9WeBhcBqkVrRi317HP4wZHWtboJAg?e=Ss6lTb

Please do get back to us if you need any further assistance in this regard.

Thank you.

Best regards,
Praseedha

Hi Prassedha,

As mentioned, would be nice to have a short video for the prototype on multi channel imaging in zen core. Multi scene is not required unlike the Japanese customer.

This is the ANZ customer requirement:

> to take an RL FL image and TL BF image in one multi-channel 'snap'?

Thanks, Praseedha!

Please see the attached RFQ. More regularly now we are getting these requests for fully motorized upright systems that are typically for materials BF and POL imaging but they now also want to include fluorescence. I'd like to confirm that if multi-channel imaging using FL is needed that this still excludes us from using ZEN Core? This is a shame as ZEN Core has so many features that are beneficial to this type of customer. We can control a Colibri inside ZEN Core but are we able to take an RL FL image and TL BF image in one multi-channel 'snap'? Will need to configure for ZEN Blue and at this stage with a fully mot Axio Imager.M2.

Also, if you have any pre-made configs that match this requirement let me know.

Thanks,
Kyall

Dear Kyall,

CSIRO is requesting quotes for replacement of an upright compound epifluorescence microscope system with digital imaging capabilities.

The attached Request for Quote (RFQ) outlines the background application, system requirements and quote submission process.

If you wish to respond, please do so by **COB Monday 25 January, 2021**.

Please address all correspondence to this email.

Regards,

Richard Kempton
